Drawings

Figures 1A-3B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-33 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The terms "wherein said reflective material is isolated from an etching process" in claim 1, last line, "wherein said correlation material is isolated from an etching process" in claim 12, last line, and "wherein said opaque material is isolated from an etching process" in claim 23, last line, are new matter. The specification does not describe isolating the reflective material from an etching process; Fig. 5A and Fig6A show that is etched.

Response to Arguments

The 35 U.S.C. §112, second paragraph is withdrawn. The prior art rejections over Nishioka are withdrawn.

As to the drawings, applicants argue that Fig.1A-3B are "Related Art" and not "Prior Art". Examiner disagrees. The specification on page 2, lines 17-18 recites:

Application/Control Number: 09/695,028

Paper No. 11 Art Unit: 1765

Figures 1A-3B illustrate the conventional etching process and the laser reflectance signal for the conventional dry etching of a chrome on glass etch.

The brief description of the drawings on page 6, lines 8-9 also recites the conventional process.

A conventional process is a prior art process.

The proposed drawing amendment is acceptable to overcome the objection to the reference numeral additions to the figures.

As to the arguments about Nishioka, examiner acknowledges that Nishioka does not disclose isolating the reflective material from the etching process, therefore Nishioka does not read on the claims as amended. However, the new limitation is new matter as described above.

Examiner notes col.5, lines 46-47 of Nishioka that recites "second reflected light L_{RA} has no relation to etching progress." This part of Nishioka reads on the gist of the instant invention. The resist layer 3 of Nishioka is not immune from the etch process and is also etched to some degree. Nishioka also "correlates" as broadly cited in the claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Paper No. 11 Art Unit: 1765

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
